

Feedback Events

- ❖ A Part can Send () events to itself
- ❖ Events are queued, therefore no runaway problem
- ❖ Feedback can be used to create a “Loop”.
 - ❖ Expunge Loop (and Recursion) from the language
 - ❖ Architect can create Loops by using Feedback

Concurrency

- ❖ Parts are Concurrent
 - ❖ see Rob Pike “Concurrency Is Not Parallelism”
 - ❖ <https://www.youtube.com/watch?v=oV9rvDIIKEg>
