No Loops, No Recursion

- "Loop" construct must be deprecated. Removed from new HLLs.

- "Recursion" must be deprecated.

- "Loop" doesn't make sense in distributed programming.

- "Recursion" doesn't make sense in distributed programming.

- "Loop" and "recursion" make sense only on a single CPU.

Feedback Events

- A Part can Send () events to itself

- Events are queued, therefore no runaway problem

- Feedback can be used to create a "Loop".

  - Expunge Loop (and Recursion) from the language

  - Architect can create Loops by using Feedback
